

STREAMLINE YOUR BOAT RENTAL OPERATIONS

SailOps is a comprehensive platform that enables you to manage boat rentals, fleet administration, periodic maintenance, check-in/check-out, inventory tracking, and branch and central operations in an integrated manner.

With its user-friendly interface, you can easily monitor your operations, streamline all processes from a single point, and save both time and costs.

WHY CHOOSE SAILOPS?

Check-in/Check-out
Periodic Maintenance
Document Management
Inventory Management
Fleet Management

SailOps allows you to monitor the status of all boats in your fleet in real-time, plan maintenance processes, and offer practical solutions that enhance customer satisfaction.

BOAT AND FLEET MANAGEMENT

SailOps enables you to manage all boats in your fleet in detail and optimize your operational processes.

The system provides the ability to view all technical and operational information about each boat on a single screen.

Technical Specifications and Details

You can instantly view and manage all technical details of your boat, such as engine power, fuel capacity, and dimensions. This allows you to plan maintenance and operational needs more effectively.

STAY IN CONTROL WITH DETAILED FEATURES

Document Management

SailOps enables you to manage critical documents for your boats, such as licenses and port registration certificates, in a digital format. You can monitor document updates and access them quickly when needed.

Rental Status

You can track which boats are rented, which are available, and when each boat is scheduled to return. This allows you to easily manage rental and operational planning.

These features demonstrate SailOps' strength in fleet management, ensuring that your boats always operate at peak efficiency.

CHECK-IN/CHECK-OUT MANAGEMENT

SailOps streamlines the digital check-in/check-out processes for your boats.

Custom Check-in/Check-out Lists

You can manage all processes in detail with custom digital checklists created for each boat. The checks performed before and after rentals are tailored to the boat's specific needs and features.

Personnel and Date Tracking

Information about the personnel performing the checks and the dates are recorded in the system, ensuring transparent monitoring of the processes.

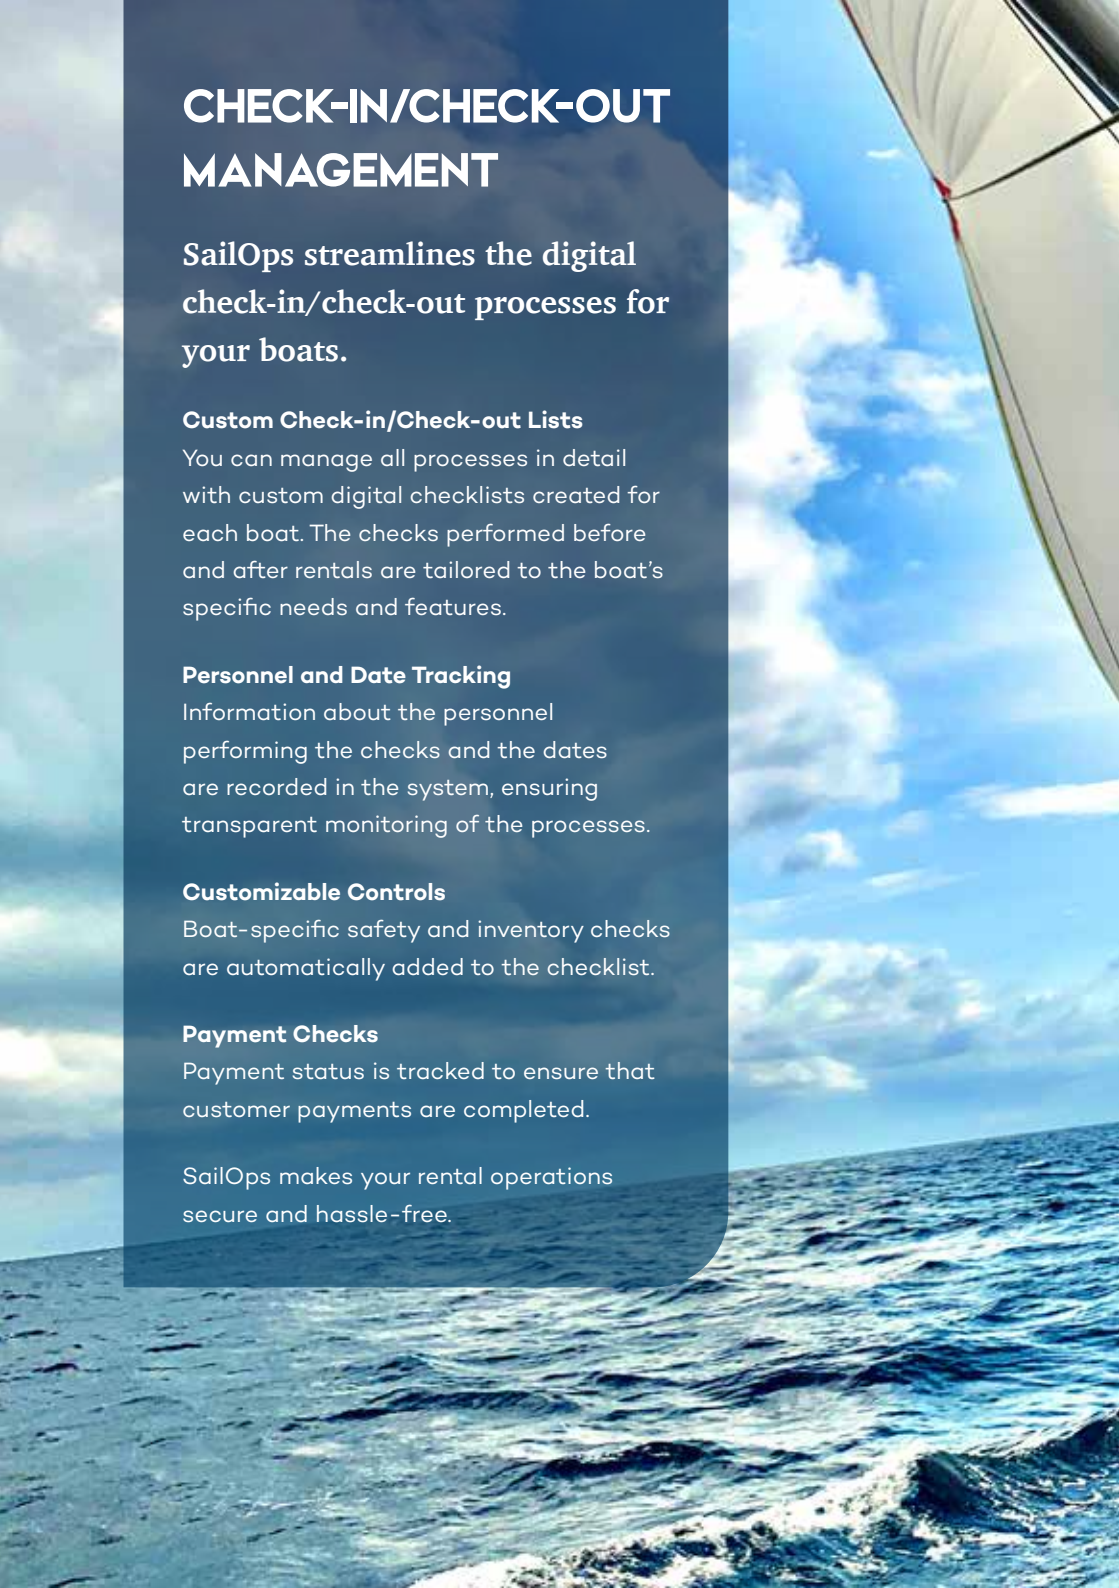

Customizable Controls

Boat-specific safety and inventory checks are automatically added to the checklist.

Payment Checks

Payment status is tracked to ensure that customer payments are completed.

SailOps makes your rental operations secure and hassle-free.

MANAGE YOUR INVENTORY SEAMLESSLY

SailOps allows you to manage each boat's individual inventory as well as a central main inventory depot.

Boat-Based Inventory Management

You can create custom inventory lists for each boat, recording the equipment, materials, and spare parts present on board. This enables you to track everything needed for the boats, preventing stock shortages or surpluses.

Central Inventory Depot

By managing your main inventory depot, you can organize all necessary supplies for your fleet from a single location. You can quickly identify any missing items on a boat and source them from the central depot, providing rapid solutions as needed.

This system enhances operational efficiency while ensuring that the boats are always ready and available for rent in a complete condition.

MAINTENANCE MANAGEMENT

+TRACKING

+REPORTING

SailOps offers an advanced maintenance management system that helps you effectively manage the maintenance processes for your boats.

Periodic Maintenance and Part Management

You can track your boat's regular maintenance needs and part conditions, receiving reminders for upcoming maintenance dates. Timely maintenance ensures that your boats operate smoothly.

Maintenance Documents and Tracking

All documents related to completed maintenance are stored digitally. You can easily access the boat's maintenance history and compare the results of pre- and post-maintenance check-in/check-out processes.

Maintenance History

The maintenance history of each boat is recorded in detail within the system. You can review past maintenance activities and analyze the long-term performance of the boats.

Unscheduled Maintenance

You can quickly initiate unscheduled maintenance processes for damages incurred during rentals and manage these procedures through the system.

Service Provider Management

Maintenance service providers are recorded within the SailOps system, allowing you to track which services have been performed and choose between different providers.

Maintenance Costs and Invoices

The costs and invoices for maintenance can be managed through the system. All maintenance expenses are recorded in detail, making it easy to analyze costs.

With these features, SailOps helps you protect your boats effectively while enhancing operational continuity and the performance of your vessels.
